GOALS

My goal is to learn more about this branch of technology and use this knowledge to my advantage.

ABOUT THE STUDY

the study is very interesting because they use that is very big and wide on the tecnologia and day a day for the people

MY EXPERINCE

My experience at SENA was very positive because of the flexibility and organization of the study, and the guides were very helpful and provided me with new knowledge.

WHAT IS ?

Software development and analysis is a process of creating and maintaining information systems as requested by the client.

HOW DOES IT WORK?

The first function is project planning to be clear about what to do, the second is design, the third is creating the project with code, the fourth is deploying it, and the last is maintenance.

SOFTWARE DEVELOPMENT AND ANALYSIS

Hello, my name is Alvaro and I'm a software development and analysis student and I'm 17 years old.
